Software Installation

Windows 98/98SE/2000

1. Insert the driver CD into CD-ROM.
2. Start Windows Explorer, navigate to CD-ROM, open “Win98”or”Win2k” folder and double-click setup.exe or install.exe.
3. Follow the instruction and the driver will be installed automatically. After installation, reboot your computer.
4. After reboot, plug the Card Reader/Writer into the USB port. You will see the 4 extra icons in “My Computer”.

NOTICE: If you just see 4 Windows default icons without flash card logo in the “My Computer”, press F5 to refresh your screen.

Windows Me / Windows XP

For Windows Me and XP users, there is no need to install extra driver. Simply plug your Card Reader/Writer into the USB port; you shall see 4 extra icons in your File Manager. Linxcel 6 in 1 Card Reader/Writer is ready to go.

Remark: With Windows Me and XP, it works as an extra Removable Disk instead Flash Card icons shown in “My Computer”.

MAC OS 10.1.2

For MAC OS 10.1.2 users, there is no need to install extra driver. Simply plug your Card Reader/Writer into the USB port; Linxcel 6 in 1 Card Reader/Writer is ready.

MAC OS 9.X

1. Insert the driver CD into the CD-ROM.
2. Start Windows Explorer, navigate to CD-ROW, open the “9.0” or “9.0.4 or later” folder, and double-click “Installer”.
3. The Installer dialog box is displayed. Follow the instruction and the driver will be automatically installed. Follow the instructions, when the installation successful dialog is displayed, click “Finish”, close all of the open windows, and then reboot your computer.
4. After reboot, plug the Card Reader/Writer into the USB port.
